European Journal of Operational Research 74 (1994) 582–583
North-Holland

Contents Volume 74

1 Equity measurement in facility location analysis: A review and framework *(Invited Review)*
M.T. Marsh and D.A. Schilling
18 Multiproduct integrated production–distribution systems
D.F. Pyke and M.A. Cohen
50 Valuing fixed price supply contracts
B. Kamrad and P. Ritchken
61 Measuring dynamic efficiency under risk aversion
J.K. Sengupta
70 An insight into dynamic channel assignment in cellular mobile communications systems
P.K. Johri
78 A stochastic dominance analysis of ranked voting systems with scoring
W.E. Stein, P.J. Mizzi and R.C. Pfaffenberger
86 A multi-echelon queueing model with dynamic priority scheduling
A. Gupta and S. Webster
95 A decomposition approximation for finite-buffered flow lines of exponential queues
M.C. Springer
111 Scheduling jobs to minimize total cost
Y.L. Chen
120 Scheduling jobs with release times on a machine with finite storage
W.M. Nawijn, W. Kern and S. Baas
128 A note on worst-case analysis of approximation algorithms for a scheduling problem
E. Nowicki and C. Smutnicki
135 A search strategy for the one-size assortment problem
H.H. Yanasse
143 Value considerations in three-dimensional packing – A heuristic procedure using the fractional knapsack problem
B.B. Mohanty, K. Mathur and N.J. Ivancic
152 Decomposition method application to a large scale linear programming WIP projection model
J.S. Kim and R.C. Leachman
161 A computational analysis of the Auction Algorithm
B.L. Schwartz
170 An approximate algorithm for nonlinear integer programming
V. Vassilev and K. Genova
179 Stability in multiobjective possibilistic linear programs
R. Fullér and M. Fedrizzi
188 An ordered independence system and its applications to scheduling problems
Y. Lin

Special Issue Financial Modelling

197 Editorial
T. Martikainen, I. Virtanen and P. Yli-Olli
198 World wide security market regularities
W.T. Ziemba
230 Distributional analysis to model atypical behavior
D.-E. Baestaens
243 An interest rate risk management model for commercial banks
W. Bessler and G.G. Booth
257 Threshold margins, growth, and inflation: Creating real economic value
B. Doyle, D.L. Blakley and L.W. Murray
273 Nonlinear dependence in Finnish stock returns
G.G. Booth, T. Martikainen, S.K. Sarkar, I. Virtanen and P. Yli-Olli
284 A diagnostic model for improving the efficiency of an existing portfolio
D.J. Bradfield

284 A diagnostic model for improving the efficiency of an existing portfolio
D.J. Bradfield

0377-2217/94/$07.00 © 1994 – Elsevier Science B.V. All rights reserved

294 A market utility approach to investment valuation
E. Kasanen and L. Trigeorgis
310 The theory of Geometric Stable Distributions and its use in modeling financial data
T.J. Kozubowski and S.T. Rachev
325 The diversification of currency loans: A comparison between safety-first and mean–variance criteria
J. Seppälä
344 The economic explanation of the strategy of a self financing firm during the recession period
P.A. Verheyen
350 Evaluating probabilistic forecasts of stock prices in a developing stock market
D. Önkal and G. Muradoğlu
359 The economic value of stocks and call options on the Swedish financial market
R. Östermark and J. Aaltonen

379 Fuzzy sets theory applications in traffic and transportation *(Invited Review)*
D. Teodorović
391 Unified interactive multiple objective programming
L.R. Gardiner and R.E. Steuer
407 Avoiding rank reversal in AHP decision-support models
S. Schenkerman
420 Reply to Schenkerman's avoiding rank reversal in AHP decision support models
L.G. Vargas
426 Highlights and critical points in the theory and application of the Analytic Hierarchy Process
T.L. Saaty
448 Throughput analysis in manufacturing networks
G.R. Bitran and D. Sarkar
466 Stochastic frontier production analysis: Measuring performance of public telecommunications in 24 OECD countries
T. Sueyoshi
479 Mathematical programming models for ownership and control of European and American groups of companies
J.S.H. Kornbluth and G.R. Salkin
495 The log bucking problem: A comparison of dynamic programming versus branch and bound
P.M. Bobrowski
509 Overlapping machine groups in semiconductor wafer fabrication
P.K. Johri
519 A decision modes for shift scheduling of nurses
S. Perrott Siferd and W.C. Benton
528 Stochastic allocation of a resource among partially interchangeable activities
A. Martel and J. Ouellet
540 Working set generation methods for labor tour scheduling
S.E. Bechtold and M.J. Brusco
552 The dynamics of make or buy decisions
S. Balakrishnan
572 On the role of discrete bid levels in oral auctions
M.H. Rothkopf and R.M. Harstad
582 Contents Volume 74
